Sample Banana Runtz

Sample ID SD220520-008	(48459)		Matrix Concentrate (Inho	ılable Cannabis Good)	
Distributor License 604034860 Address			7 Vanderbilt, Irvine CA, 92618	Name	Savage Enterprises
Sampled -	Received	May 19, 2022		Reported May 23, 2022	
Analyses executed CAN2	0				

Laboratory note: The estimated concentration of the unknown peak in the sample is 10.6% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC.

Sample Tangie Sunrise

Sample ID SD220520-010 (48461) Matrix			Concentrate (Inhalable Cannabis Good)				
Distributor License 604034	860	Address	7 Vanderbilt,	Irvine CA, 92618		Name	Savage Enterprises
Sampled -	Received	May 19, 2022			Reported	May 23, 2022	
Analyses executed CAN	20						

Laboratory note: The estimated concentration of the unknown peak in the sample is 9.0% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC.

Sample Strawberry Slush

Sample ID SD220520-0	005 (48456)		Matrix Concentrate (Inho	Matrix Concentrate (Inhalable Cannabis Good)				
Distributor License 60403	34860	Address	7 Vanderbilt, Irvine CA, 92618	Name	Savage Enterprises			
Sampled -	Received	May 19, 2022		Reported May 23, 2022	2			

Analyses executed CAN20

Laboratory note: The estimated concentration of the unknown peak in the sample is 11.2% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC.

Sample Double Bubble OG

Sample ID SD220520-009 (48460)		Matrix Concentrate (Inh	alable Cannabis Good)		
Distributor License 604034860 Addr		Address	7 Vanderbilt, Irvine CA, 92618	Name Savage Enterprises	
Sampled -	Received	May 19, 2022		Reported May 23, 2022	
Analyses executed CAN	20				

Laboratory note: The estimated concentration of the unknown peak in the sample is 11.6% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC.

CAN20 - Cannabinoids Analysis

Analyzed May 23, 2022 | Instrument HLPC

Measurement Uncertainty at 95% confidence 7.806%
