3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC
ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368Sample **HAPPI X TORCH - Larry Bird**

Sample ID	SD220512-022 (48291)	Matrix	Concentrate (Inhalable Cannabis Good)	
Tested for	Latro inc			
Sampled -	Received	May 12, 2022	Reported	May 12, 2022
Analyses executed	QARUSH, CAN20		Unit Mass (g)	2.2

Laboratory note : The estimated concentration of the unknown peak in the sample is 4.7% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC.
